

# How Can Chimorel Support You?

## *Lesson 3: Your Secret for Success*

30+ Gold Nuggets ✨

[Disclosures](#)

The third of seven lessons is knocking on the door of your awareness. Your Secret to Success has been parsed from Napoleon Hill's [\*Think and Grow Rich\*](#). You can download a free copy of his 253 page book by clicking this link. The Gold Nuggets in this lesson are scattered throughout the text, rather than summarized at the end. We also include insights from Eckhart Tolle's *A New Earth*. We'll teach you how to acquire this book at a significant discount on request.

# Introduction

Many years ago Andrew Carnegie challenged Napoleon Hill to study the lives of successful men, then publish the secret for their success to the world. Mr Hill accepted the challenge and after 25 years of research published *Think and Grow Rich*. It was Mr Carnegie's desire that the success principles and the magic formula which gave him his fortune be taught in all public schools and colleges. Mr Carnegie believed the world would be better if all could learn this secret.

In *Your Secret to Success* lesson we pick up Mr Carnegie's challenge and share insights from Hill's book with you. **We update Hill's research with recent, relevant**

**research where appropriate, using text formatted similar to this sentence** and include insights from Eckhart's book ***A New Earth***.

Not long ago, we asked you "What is your WHY?" and opened the door to uncovering your burning desire. May that desire impel you to achievement beyond your wildest dreams. As you travel along your success journey, we ask you to ... pass it forward. Perhaps, together, we really can make the world a little better.

The secret has been passed to millions of people, tested on thousands and picked up by hundreds of exceedingly wealthy men and women. Once you uncover the secret, apply the principles and achieve whatever you can transmute to a tangible reality from your burning desire. The secret is more likely to be picked up when it is uncovered by those who are ready and searching for it.

## Initial Insights

We are all connected within a Universal field of energy at a profoundly deep quantum level. We communicate with this field through the language of emotion, a language we all understand. As we travel from birth to death, we occasionally stop to smell the roses, walk in the woods or pause beside the ocean. For a moment we suspend thinking and just become aware of the beauty, innocence, power, majesty and depth of something just beyond our thinking.

Gaze at the night sky and catch the twinkling sense of energy flowing. You cannot see or hear this energy. You can sense it's presence. Quantum physics has begun to reveal the power of the observer and the depth of our connectedness.

Millions of years ago a flower appeared. Time passed, a critical threshold reached and the world burst into delicate hues and fragrance. More time passed. Perhaps the first thing we humans valued, without utilitarian purpose, was a flower. Today, when you awaken to the beauty in creation, your joy allows you to glimpse an essential part of your innermost nature, your true self, connected as part of all human consciousness, to be enlightened.

With the first smack to start your breathing at birth you feel pain and discover you are an individual with feelings. You move from being one with your mother and the rest of the universe to a hungry individual with wants that are not always met. You learn words. You begin to think. Your ego develops. You move away from just being aware and at peace. Struggle and suffering become part of your existence. Hopefully, not too great a part, but ... are you really ready to awaken to your life's purpose?

### [Awaken to Your Life's Purpose](#)

We insert these Initial Insights here at the beginning because we believe success is more than thinking and becoming rich. We see a difference between [Riches vs Wealth](#). We believe there is a yearning for a radical transformation that takes us beyond the collective materialization of insanity you and I experience in the world we live in now. We invite you to explore seven concerns in our [Vision](#). The truth may be that we either evolve away from our focus on the material toward awareness that we really are all connected or we die.

Thinking about and becoming rich is a worthy pursuit in the context of being aware that when I hurt you, I also hurt myself. Now let's continue to uncover your Secret to Success.

## Fourteen Principles +2

As you uncover the secret, apply these fourteen principles to achieve whatever you genuinely want to achieve:

- |                          |                       |
|--------------------------|-----------------------|
| 1. Desire                | 8. Persistence        |
| 2. Faith                 | 9. Master Mind        |
| 3. Auto-suggestion       | 10. Sex Transmutation |
| 4. Specialized Knowledge | 11. Subconscious Mind |
| 5. Imagination           | 12. Brain             |
| 6. Organized Planning    | 13. Sixth Sense       |
| 7. Decision              | 14. Overcoming Fear   |

+1= Surrender Ego to Live in the Present Moment  
+1 = Divine Matrix

Once you uncover Your Secret to Success, you will discover that nothing comes for free, 0-4-0. Hill's way of saying this is "there is no such thing as something for nothing." As noted, you will discover other modest changes we make throughout this lesson, *a few additions based on current knowledge* and some additional insights.

### The secret has a price.

It cannot be bought. It cannot be given away. It must be discovered. Money, fame, recognition, happiness can all be had by those who are ready and determined to achieve these blessings.

Hill offers this guarantee: "I have never known anyone who was inspired to use the secret, who did not achieve noteworthy success ... I have never known any person to distinguish himself, or to accumulate riches of any consequence, without possession of the secret."

- ✦ *Your secret to success cannot be bought or given away. It must be discovered. When you are ready, pick up this gold nugget.*

Here is a [list](#) (in no particular order) of just a few of the hundreds of well-known lives, Hill studied during his twenty-five years of research. *Throughout this lesson we will provide similar resources with a link, rather than taking up space in the lesson itself.* You may want to study some of these lives as part of your own research.

- ✦ *Researching the lives of accomplished men and women can enable you to develop the motivation, skills and knowledge to achieve your goals.*

Thoughts are powerful things. Mix powerful thoughts with definiteness of purpose, persistence and a burning desire to achieve your goal. Your initial idea can be nourished, little by little, into a burning desire, not an ordinary hope; but an intense, flaming intention. When your thought reaches this flaming intensity you fuel the achievement of your goal. Lackluster dreams fizzle out. ***Today's research in quantum physics has determined that the thoughts of an observer can actually affect the experiment.***

- ✿ ***Mix powerful thoughts with definiteness of purpose, persistence and a burning desire.***
- ✿ ***An initial thought can become a flaming intention.***

Edison gave Edwin C Barnes the opportunity which became a partnership because “He (Barnes) was determined ... I (Edison) learned when a man desires a thing so deeply that he is willing to stake his future on it, he is sure to win.”

A bulldog determination, persistence, backed by desire can mow down all opposition. One of the tricks of opportunity is that it slips in the backdoor disguised as temporary defeat. An intangible thought impulse can transmute to its physical counterpart by the application of known principles. *Translation:* Your determined, burning desire can change a thought into gold, money, success. Stand by your desire. Learn “stick ability.” Go the extra mile. My mammy’s gotta have that 50 cents. Call the mining engineer to examine the fault lines and dig three more feet. Keep on keeping on. Turn defeat into stepping stones to success. Eliminate impossible. Learn success rules. Stake everything on those rules. Engineers told Ford the V-8 motor was impossible. He said “Produce it anyway.” After two years, they did.

- ✿ ***Opportunity slips in the backdoor disguised as temporary defeat.***
- ✿ ***Learn “stick-ability.”***

As we step into the first principle, keep an open mind. Later work through the **[Personal Analysis Questionnaire](#)**. If you are struggling, you have found friends who will believe in you, until you believe in yourself. People at Chimorel will be there when you need us, as long as you take real steps to make your life better. We support motivated people. If you aren’t ready, we will wait.

- ✿ ***When you are ready make it happen. You have someone who believes in you at Chimorel.***

# Thinking vs Awareness

***Thinking is something you do with your mind and the mind can be deceiving. Throughout most of this lesson we use the words thinking and thoughts, because those are the words Hill uses.***

***As we move towards the end of this lesson and later in Create a Chimorel Special Project we will push deeper to awareness and being present. It is through being present and aware that you truly touch the face of God.***

***Thoughts are powerful, but there is a constant struggle between the positive/negative duality of thoughts. It is possible to move beyond this duality to plan in the present. You will note that many of these “enhancements” go to a deeper level of understanding, even more powerful than Hill’s discussion. As you move closer to touching the face of God, you enhance the power of the Secret.***

## The Principles

**Principle 1: Desire. *This is where you start.***

Someday, out of the clear blue, a thought will pop into your head. Little by little that thought will intensify. It will become clearer. As your wish for riches (defined as your specific goal, which may be money, or perhaps even a specific part of a better world) changes to a definite, pulsating, passionate desire, you will form a definite/specific goal. Place all your energy, all your will power, all your effort, everything behind this goal. Burn the boats. Leave no way to retreat. Stake your future on what you want. Believe in your dream.

Below are seven steps to turn a wish into a burning desire.

1. Be definite as to amount – *2500 people, \$100,000.*
2. Determine exactly what you will give – *success opportunity, \$1,000,000 in sales.*
3. Establish a definite date – *2 years, end of this year.*
4. Create a definite plan – *use our opportunities & sub-goals, create a marketing / sales / business plan.*
5. Write out a statement – *amount, what you give, time frame, your plan.*
6. Read your statement daily (2x)
7. See, feel, and believe yourself already in possession of the amount / goal.

These steps move from definiteness of purpose to a clear understanding of what you want to a burning desire to possess it. They do not require hard labor, education or suspension of credulity. Create a white heat of desire. Believe. Plan.

Success requires no apologies. Failure permits no alibis. Every failure contains the seed of an equivalent or greater success. Do not quit. Dreams are the seedlings of reality. The depression taught humility, tolerance, open-mindedness. You are not ready, until you believe it can be done. Open-mindedness is essential for belief. Closed minds do not inspire faith, courage or belief.

Here is part of a poem. “I bargained with Life for a penny, and Life would pay no more ... That any wage I had asked of Life, Life would have willingly paid.” [Click this link to see the entire poem.](#)

## **Principle 2: Faith. *This is what powers your plan.***

Faith, love and sex are powerful, positive emotions. When you blend these powerful emotions with the “vibrations” of thought, as in prayer or in meditation, your subconscious sends these empowered thoughts to God. (Hill says Infinite Intelligence. We interchange God and the Universe) Whew! That was a pretty powerful statement.

✦ ***You can send your thoughts to God / the Universe, empowered by faith.*** *You will receive back an inspiration, which can grow into a plan.*

Before you discount the power you are uncovering, consider the various therapeutic and religious sources that tap into this power – Alcoholics & Narcotics Anonymous, other 12 step programs, RCET, yoga, meditation, grief & pastoral counseling, Existential Questioning, Energy Healing, Holistic/Natural Healing, Christian, Muslim, Hindu, Buddhist, Bahá'í.

You don't have to belong to any religion to tap into this power. You just have to be open-minded enough to let it work. At Chimorel we refer to this power as our primary Source of Strength. ***This “thinking thing” is a lot of work. Surrendering to the present brings the power of the Universe to support you.*** *Very powerful! Explore our additional insights Or read The New Earth) to understand awareness in the present moment more clearly.*

You can send an emotionalized thought into the ether. Something in that ether will receive your thought mixed with faith and send back to you opportunities to achieve your goals. Hill says “transmute desire into its physical, or monetary equivalent.” He has studied 500+ exceedingly wealthy men who have all empowered their burning desire with Faith. Once again, you don't have to belong to any religion, you just need to keep an open mind and let this power work for you.

Faith is a state of mind which may be induced, or created, by affirmation. More about affirmation when we get to the principle of autosuggestion. You are convincing your subconscious that you will receive the goal you ask for. Your subconscious will act on that belief and pass back to you, through faith, inspirations for a plan to achieve your goal. It may take time for this plan to develop fully, but when the plan begins to form *act* or the opportunity will disappear back into the ether.

This works both positively and negatively. Let's make a criminal. Our young man is initially repulsed when he first comes into contact with crime, but for one reason or another, he stays in contact with criminal activities. He becomes accustomed to and endures the criminals he associates with. Eventually he embraces and becomes influenced by his associates and involves himself in criminal activities. By associating yourself with successful people, you can follow a similar path to success.

✦ ***Associate yourself with successful people.***

Thoughts mixed with any emotion, positive or negative, influence the subconscious mind. Your thoughts can translate into either constructive or destructive plans to achieve positive or negative goals. You can focus on suicide and end up dead. You can focus on good health and live longer. You can focus on providing good service and end up wealthy. ***You can learn to be totally present and rise above positive and negative to just Be.***

Faith is an eternal elixir giving life, power and action to the impulse of thought. *Read this several times aloud. Accept it. Believe it.*

Faith is the starting point for the accumulation of wealth.

Faith is the basis for miracles and mysteries which may not be easily analyzed by science.

Faith is THE antidote for failure.

Faith is an element (“chemical”) which when mixed with prayer connects to the Universe. Faith transforms the vibration of thought into a spiritual equivalent.

Faith enables the cosmic force to be harnessed and used by man. Hill says “every one of the foregoing statements is capable of proof!” The important point here is:

✿ ***Faith truly can empower your thoughts to enable you to achieve any goal you believe in.***

You are who you are because of the thoughts which you allow to dominate your mind. Thoughts mixed with emotion become a magnetic force attracting related thoughts. In the cosmos are eternal forces of vibration. ***(Believe it or not, physics has been able to establish this as fact.)*** These vibrations may involve fear, poverty, disease, failure, misery, as well as, prosperity, health, success and happiness. Think of a radio carrying music, voice and hundreds of sounds to your ear. You can tune this radio to attract positive and negative vibrations by the thoughts which dominate your mind. Each plan, idea or purpose you hold in your mind attracts similar thoughts (thus people) to enable you to achieve your goal. ***Profound peace, joy and love can energize you to achieve your goals.***

Here are a [Self-confidence Formula](#), [another poem](#) and a story about [Charles Schwab](#) you might enjoy. Somewhere within you lies sleeping the seed of achievement. Arouse from sleep. Plant the seed. Put into action the thoughts which carry you to heights you have never before dreamed of.

Love works too. Behind the life work and achievements of many men of outstanding achievement has been the love of a strong woman.

One way to see the “miracles” of Christ is to understand the incredible power of His faith. “If you have faith as a mustard seed ... say to the mountain ... and it will be moved.”

- ✿ ***Faith, desire, imagination, persistence – among the ingredients which move mountains and achieve goals.***
- ✿ ***There are no limitations to the mind, except those we acknowledge.***
- ✿ ***Poverty and wealth both spring from your thoughts.***

***Faith flows more readily when you live in the present filled with a deep sense of joy, peace and love.***

### **Principle 3: Auto-suggestion.** *This is how you influence your subconscious.*

All impressions received through the five senses are filtered by the conscious mind. You can pass them on to the subconscious or reject them at will. It is critical that you understand this. Your mind receives a constant stream of stimuli, both positive and negative. You can choose to accept or reject this stimuli.

- ✦ *Your conscious mind can accept or reject stimuli before it reaches your subconscious.*
- ✦ *Your subconscious immediately acts on the thoughts it receives.*

Consider the subconscious as a “seat of action.” Emotionalized thoughts which reach the subconscious are immediately acted on and sent back to the conscious for implementation. ***When you are truly present the power to implement is instantly there.*** There is some incredibly powerful stuff going on here. Are you aware?

Anything your five senses pick up can be filtered by your conscious mind. If not filtered an emotionalized thought passes through to your subconscious and is acted on.

*You are walking in a dark alley late at night. Your mind senses an attack You are afraid. Your subconscious picks up the thought and triggers a fight or flight action. Fear may temporarily block involvement by your conscious. A little later your conscious mind may kick in and enable you to sort through your next action steps. Catch the powerful trigger of the fear emotion. **When you are imbued with a sense of joy, peace and love, the quietness of your presence can “disarm” your attacker.***

Now, repeat to yourself 100 times “I am a wonderful person.” Probably nothing much happens, especially if in the back of your mind you don’t really believe what you are saying. ***There is a positive/negative duality in your thinking.*** Repeating something alone does not trigger the powerful response that an emotionalized thought will. Remember in *Back to the Future 2* when George McFly overcame his fear, knocked Biff out and changed his destiny. Controlling and directing your emotions can have a powerful effect on *your* destiny.

✦ ***Controlling and directing your emotions can have a powerful effect on your destiny.***

In Principle 1: Desire, you learned seven action steps to move from a wish to a burning desire to achieve your goal. **Re-read** these steps, carefully, now. These seven steps or instructions apply the principle of auto-suggestion. Step 7 – See, feel, believe.

In Principle 6: Organized Planning, you will discover four additional instructions to establish a Master Mind alliance, which will support you and enhance the principle of auto-suggestion. Many people seeing, feeling, believing is more powerful than you alone.

See, feel believe – mix the powerful emotion of faith with the thoughts you send your subconscious. Accept the positive stimuli. Reject the negative. Is this autosuggestion principle getting through yet? Not quite?

***Again, there is a positive/negative duality in the world in which we live. Everything that happens can be stuck in this duality, until we become totally present. If we cling to the past, we may never rise above the Israeli/Palestinian conflict, mired in the offenses of the past. If we live in the future, we may miss the present opportunities.***

Let’s ask why most of the news is about the negative – wars, hurricanes, political maneuvering, etc. The dramatic negative attracts momentary attention. It is much more exciting than the bland normal. It is distracting, exhilarating, sensational, riveting. Ok, I got it. Here is a suggestion.

Turn off the TV. Focus on the positive for thirty days and watch the mental cleanse take place in your life. OR learn to reject the negative stimuli. Tell your wife why you love her. Make your screen saver a picture of your goal. Coming through yet? What you allow your mind to focus on (mixed with faith, love and other positive emotions) becomes who you are and what happens to you.

***Realize that by taking positive steps you move in the right direction, but you have not overcome the negative. Turning off the TV will not eliminate the negative from your life. It may make the negative focus subside for a while, but drama is still there ready to pounce. Staying positive is hard work and can be knocked for a loop when life happens. Go deeper. Live only in the now. Be present to Universal joy, peace and love. Surrender and find that the struggle between positive and negative subsides, empowering you to achieve the plans that drop into your consciousness.***

Once again there is a price to pay – you have to control what thoughts you think ***(better yet surrender to the present)***. Concentrate on your desire ***(or surrender)*** until it becomes a burning obsession. Close your eyes. Fix on your objective many times each day. Feel it. See it in your mind. Believe it. You are now tapping into the principle of autosuggestion. ***Are you tuning in to the amount of work involved in surrendering to the present? Ahhhhhh ... then you are missing the point. Doing work is about you and your ego. Letting go, being aware, happens with acceptance, joy and enthusiasm.***

Wait not idly for your plan to show up. Demand it. Expect it. Believe it will come. Then as the plan trickles or floods in, tune in. Write down the plan. Immediately put it into action. Your plan will flash into your mind as an inspiration. Act or it will float back into the ether unrealized. The inspiration for this eBook, then the action plan, came first as a flash, a vague but powerful feeling. “Write about Chimorel.” Then an outline formed. Little by little the pieces emerged in my mind.

Now every time I sit down to write, I use my notes or other information sources and the words begin to flow. Your plan may not take this exact path, but it will come as you focus and believe. If you struggle, borrow our plan in Lessons 4-6 for a while. ***Then go on to become an Action Planner and learn about mindset, joy, peace and love. Maybe we are supposed to work together.***

Make your plan specific. See these specifics in your possession. ***This is a focus on having it now, not a wish for the future.*** Determine what you will give in return for what you want. ***This is action today, not something someday.*** Repeat. Repeat. Repeat. Write it down. Read it out loud. Listen. Act ***today.***

Your subconscious acts on emotionalized thoughts. Faith (believing) is a powerful emotion. Skepticism is typical, **and typically flows from past memories**. Follow the instructions **today** and your skepticism will be replaced by belief, then crystallize into absolute faith. You then **are** the master of your fate, the captain of your soul.

**Principle 4: Specialized Knowledge** – *This gives you the tools to make it happen.*

- ✦ ***Knowledge attracts money, only when it is organized through practical Action Plans to achieve specific goals.***

Knowledge in general will not attract money or achieve goals. Knowledge alone is not power. The real meaning of educate (from Latin educo) is to draw out or develop from within.

To achieve your goal you will require specialized knowledge regarding the service, product or profession which you will exchange for that which you want. You can acquire this specialized knowledge or you can form a Master Mind group which provides the required knowledge. Your ability to organize and direct a Master Mind group can provide the knowledge you need and enable you to achieve your goal.

First determine what kind of knowledge is required. Then know where to get the knowledge you require. You can obtain knowledge from your own experience and education. You can obtain knowledge from the experience and education of others (Master Mind alliance). Knowledge can be obtained from colleges and universities, public libraries, the internet and specialized training. Once obtained, knowledge must be organized and put to practical use to achieve a definite purpose, through practical plans. Continue to obtain and organize knowledge to achieve your ongoing goals.

✦ ***Throughout your Success Journey never stop obtaining specialized knowledge, organizing it, developing plans and linking with others who have the knowledge which can enable you to achieve your goals.***

Once again, the first step is to know what you want. This is just as true in creating a career as it is in developing a business. Let's address "free" vs paid training by considering Chimorel's "*I Got a Job*" program.

Anyone can join our "*I Got a Job*" program by signing a Registration Agreement. The form calls for a minimum of 50 hours volunteer labor. Then you begin getting assignments.

One of the first assignments is to learn the four steps to get a job: 1) Determine *what* you want to do. 2) Determine *where* you can get a job doing what you want to do. 3) Determine *who* at each company (where) is the person that makes the hiring decision. 4) Determine *how* to convince that person you are the person they need. *What, where, who, how – in that order.*

✦ ***Getting a job involves determining: 1) What, 2) Where, 3) Who and 4) How.***

Did you catch the fact that there is a cost (50 hours volunteer labor). This cost places a value on what is received. The cost initially may be work. Soon this work must generate actual revenue. This revenue is the source of funds you pay for the training received from our Work Experience Coordinators. At say \$10/hr you are paying \$500 for the first phase of your "*I Got a Job*" program. This work teaches self-discipline.

Did you also pick up the specialized knowledge it takes to get a job? There were four specific steps. Within each step was a multitude of additional learning required to actually get the job. Getting access to this kind of specialized knowledge takes effort and other resources. It is not free. When you are "entitled" to a free public education, too often you place little value on the opportunity and never learn to organize specific knowledge to achieve your goals.

✦ ***A free education is not “free.”***

You have lost your job. What do you do? Step 1: Determine what you want to do. The sooner you determine *What*, the quicker you can obtain the specialized knowledge required for *Where*, *Who* and *How*. Once you clearly know what, you can decide whether to seek a job, start a business or go back to school.

Should you choose to enter Chimorel’s “*I Got a Job*” program, we may teach you how to develop a plan to market yourself. Your plan can involve writing a “book” about: Your skills, experience and education; Evaluation of the competition in the *Where* (business, industry, etc.); Library and internet research; Creation of a specific plan to address the needs of the company you choose to work for; and more.

Whether you do it through Chimorel or on your own, you will want to know what you want. Then organize your specialized knowledge into a practical plan to achieve your goal.

**Principal 5: Imagination** – *This is where your plans are formed.*

You can use “synthetic imagination” and “creative imagination” to develop your action plan. Developing and using your imagination will dramatically enhance your achievements. It can be said that you are only limited by your imagination.

✦ ***You are limited only by your imagination.***

Through “synthetic imagination” you learn to arrange old concepts, ideas and plans into new combinations. Through synthesis many inventions occur. You can start with Chimorel’s Action Plan and use it until your plan materializes. Synthesis works with your experience, education and observation. Nothing new is created.

“Creative imagination” is triggered by “hunches” and “inspirations” from Energy in the universe. It is new, heaven sent, from God. **Matter comes from energy. Matter returns to energy. Matter communicates with energy.** You can send your thoughts into the universe, empowered by emotions, and the universe will trigger inspirations in your mind. Act on these inspirations before they return to the ether.

**You once were a cell, smaller than the point of a pin. You grow to become a human with the ability to think from this tiny cell.** An idea can form in your mind. Through desire and planning this idea can grow into the tangible things you conceive in your imagination.

**This matter/energy thing is real. Through quanta physics (below the level of the atom) scientists have discovered that within each cell is a level where matter and energy jump back and forth.** We discuss this concept in much greater detail in *Create a Chimorel Project*, in other ebooks we write, on our website and more in these lessons.

Through imagination Coca Cola became a worldwide employer from a formula in an old kettle. Through imagination Dr Gunsaulus transformed an idea into a \$1 million investment which became the Armour Institute of Technology. Andrew Carnegie planted a seed which became a career for Napoleon Hill, as well as, the book *Think and Grow Rich*. Christ planted the seed “Do unto others as you would have them do unto you.” This idea has transformed millions of lives and may someday enable you and I to make the world a little better.

I would like to suggest a partnership with you. As you read Chimorel’s Action Plan in the Lessons 4-6, pick a few of the opportunities and do them. Yes, as partners together, we can have an impact. We will plant a seed that will grow. Believe it. Achieve it.

## **Principle 6: Organized Planning** – *This transforms desire into action.*

When you begin to organize and plan to achieve some significant goals in your life, be wise enough to seek the counsel of others who can provide experience, education, native ability and imagination to support you. Here are four steps to develop your Master Mind group.

1. Ally yourself with many people to create and carryout your plans.
2. Determine what benefits you can offer the members of your group in return for their cooperation.
3. Meet/talk with members of your group regularly (once/twice weekly), until your plans are perfected.
4. Maintain real harmony among your Master Mind group.

Creating and maintaining a Master Mind alliance will be a major part of achieving big goals. The people you associate with will draw you up to higher levels of achievement or pull you down (like crabs in a basket). Pick your Master Mind group carefully.

You may initiate your own plans, but be sure they are reviewed by your Master Mind group and listen to their counsel. Your plans must be practical and workable. Like Edison, you may fail 10,000 times. Rework your plans. Listen to your “advisors.” Learn from each temporary setback. Make it happen. Be sure the members of your Master Mind group do not take defeat seriously and will enable you to maintain a winner mentality.

✿ ***A quitter never wins. A winner never quits.***

Almost every great fortune started in the form of compensation for personnel services or the sale of an idea. If you don't have property, does it make sense that you will exchange your services and ideas in order to achieve your goals?

There are leaders and there are followers. The difference in compensation is significant. An intelligent follower learns to become a great leader by acquiring knowledge from his leader. Here are [eleven attributes](#) of leadership. Here are [ten causes of failure](#) in leadership. Here are [30 causes of failure in life](#). You can correct 29 of these causes and can link with your Master Mind group to deal with the first one.

As you begin to negotiate your salary, be sure you know what you are worth and determine what you can offer that makes you worth more than you currently earn. Again, here is the [Self-analysis Questionnaire](#). Check your answers with someone who knows you well and will hold you accountable.

You have had an opportunity to reflect on leadership, to reflect on forming a Master Mind group, to consider the causes of failure and to analyze yourself. Now review. Once you have assimilated this information, you are ready to create a plan to achieve your goals. As you create your plan, be sure you understand 0-4-0. Hill calls this the law of economics. In order to get something of value you must provide something of value. If you want a million dollars, provide something worth at least a million dollars to someone who wants what you provide and will pay you \$1 million for it. Develop a plan to make it happen and you will get what you earn.

If you are seeking a job, consider entering Chimorel's [I Got a Job](#) or [Create a Career](#) programs. You will learn the four steps to get a job (1-What, 2-Where, 3-Who, 4-How); ways to market your services; the importance of service, quantity, quality and spirit; and much more. We may support you to develop a plan to market yourself.

## Principle 7: Decision –*This makes it happen.*

Learn to decide promptly and change slowly. *“But what if I make a mistake. I have to get all the facts before I can decide.”* I hear you. Beware! Indecision becomes procrastination. Learn to decide based on the facts you can obtain reasonably quickly, as well as, your experience and advice from your Master Mind group. If you make a mistake, review the process, then make a new decision based on your new experience, additional research and revised advice.

### ✦ *Indecision leads to procrastination, which means nothing happens.*

Understand, opinions of friends, family and “experts” have value only if they have done what you are planning to do. Think clearly. Decide quickly based on the best wisdom you can find. Change slowly. If you make a mistake, make a new decision based on new experience and research.

When doing your research, seek facts quietly. Listen much, analyze, talk little. Talking builds your ego, dissipates your focus and gives your ideas away. If you are quick to talk and slow to act, someone else may achieve your goal. Be slow to talk and quick to act.

### ✦ *Genuine wisdom is made conspicuous by modesty and silence.*

✦ *Do it, don’t say it. Deeds count more than words.*

✦ *Be slow to talk. Be quick to act. The Universe loves speed.*

*“Mr Adams, I have been authorized to confer on you such benefits ... on condition you cease opposition ... It is the Governor’s advice ...*

*Samuel Adams replied, “Tell Governor Gage that it is the advice of Samuel Adams to him, no longer insult the feelings of an exasperated people.”*

Now let me ask, what kind of courage does it take to make a decision that creates a nation? **Long ago Adams acted in the present and our country was born.**

## **Principle 8: Persistence – This is the will power to finish.**

Combine persistent will power with desire to insure achieving your goals. Lack of persistence is a weakness which can be overcome by effort.

- ✦ ***Persistence is to character what carbon is to steel.***
- ✦ ***Lack of persistence will be overcome by the intensity of your desire.***

Your first test of persistence will come as you begin to implement the action steps of your plan to achieve your goal. Lack of persistence is one of the major causes of failure. Build a stronger fire under your desires. Acquire “money consciousness.” Attune your mind to the vibrations which will attract the resources to achieve your goals.

Another test of persistence will come as you begin to respond to our assignments and emails. Your willingness to persistently respond, will make the difference between whether we can actually enable you to achieve your goals and your sitting frustrated on the couch wondering why nothing works.

Surround yourself with people who care. This may eventually become your Master Mind group. Through the cooperative efforts of this group, you can develop persistence. You can add to these efforts through autosuggestion. Enable your subconscious to form a clear picture of your goals. You will no longer be bothered by lack of persistence. When you respond, Chimorel will be there to support you.

The subconscious works continuously ***in the present*** – awake or asleep. Focus on your goals. Release “poverty” thoughts. Constantly form habits that reinforce “money consciousness.” *If you are bothered by the greed implied by the phrase “money consciousness,” recognize that it is the specificity of your goal, not the money that is at work. \$1,000,000 is specific and gives you the funds to support others. From now on we will change the word riches (Hill’s term) to wealth (our term)*

✿ ***With persistence comes success.***

✿ ***Specific goals can be achieved.***

Cultivate the habit of persistence to insure yourself against failure. You will learn to overcome every temporary defeat. There is a hidden Guide which tests you with many discouraging experiences. The hidden Guide allows no great achievement without passing the test of persistence.

✿ ***Every failure brings the seed of an equivalent advantage.***

Persistence is a state of mind. It can be cultivated. This state of mind includes definiteness of purpose (specific goals), desire, self-reliance, definiteness of plans (specific action), accurate knowledge, cooperation, will power, habit. Take inventory of these factors within yourself, courageously, point by point, and gain a new grip on yourself. Here are [16 symptoms](#) of the lack of persistence. Here are [four steps](#) to develop persistence.

Here is a personal story to bring this home. Shortly before taking Mrs Beautiful on a trip to Germany and Austria for two weeks I ordered Adobe Acrobat 10 Pro so I could create the pdf files you are reading. I anticipated that when I returned I could download the program from links in an email.

On return, no email. I called. It was sent. Again, no email. I called. No email. This went on almost daily for about five weeks. Finally, I got someone who gave me the information I needed to contact Adobe. It took several calls to get to the person who could enable me to actually download the program. The download took more than an hour. When I started to create the first pdf, I got a message “files missing.” More calls to learn that the program was not compatible with Word 2002, the Word on my computer at that time. Download again to my laptop, which had Word 2007.

45 minute download. And finally I could turn this file into a pdf document you can download from our website. *Since that time all these programs were updated and the Lessons have been revised. This additional work required persistence.*

## **Principle 9: Master Mind** – *This is the power behind the plan.*

How do I say this so you truly understand? There is you. Then there is your Master Mind group. Then there is the Master Mind. You become more powerful as you tap into each higher level of power. At Chimorel we talk about two Sources of Strength. Our primary source is God, **a Universal Presence**. Our second source is the people you connect with who support you. As you genuinely believe, decide to achieve **and act in the present**, you become more powerful within yourself. When you reach out to others, you add to your power. Finally you learn to tap into the power in the Universe and again you add to your power. By yourself, you will never be as powerful as you can be when you tap into the other Sources of Strength.

### ✦ ***Tap into all the Sources of Strength (Power) available to you.***

Power flows from organized and intelligently directed knowledge. Your organized effort enables you to achieve your goals. Sources of organized knowledge are 1) Inspiration from Infinite Intelligence (Hill's term). 2) Accumulated experience – public library and internet. 3) Experiment and research – when accumulated experience is not available. You convert organized knowledge into power by acting on your definite plans in cooperation with others.

You gain power through your Master Mind group by coordinating the knowledge and effort, in a spirit of harmony, from those committed to supporting you achieve your goals. There are two characteristics of the Master Mind principle – psychic and economic. Economic advantages are created from the advice, counsel and cooperation of those willing to support you. The psychic advantages are more difficult to grasp. They reference spiritual forces, exemplified in the phrase “No two minds come together without creating a third, invisible, intangible force which may be likened to a third mind.” Let’s illustrate the power behind this third force with a brief discussion of energy and matter.

***In the universe there is energy and matter. Matter may be broken down into molecules, atoms, electrons, etc. These units of matter can be isolated and analyzed. Energy may also be broken into units which can be isolated and analyzed, such as nuclear, electromagnetic and gravitational.***

Another form of energy is manifested in your ability to think. View your brain as a single battery. Combine your brain with others to form a group of batteries, capable of producing more energy than yours alone could produce. When a group is coordinated and functions in harmony, the increased energy created through the alliance becomes available to everyone in the group. Henry Ford overcame poverty, illiteracy and ignorance by allying himself with men like Thomas Edison, Harvey Firestone, John Burroughs and Luther Burbank. Mahatma Gandhi became one of the most powerful men of his time by inducing 200,000,000 people to coordinate in a spirit of harmony toward a definite purpose.

***Below the level of the atom matter and energy jump back and forth. Light is both a wave and a particle. At this level matter and energy intermingle. This flow of matter and energy is consistent throughout the universe. There is a power here you don’t want to ignore. You can tap into this power with a present focus. When you can get out of the way of your mind and thoughts, you enter into a deep universal joy, peace and love that empowers your action through awareness.***

Power mixed with desire, faith and persistence can be applied through a plan and put into action to accomplish significant goals. This same power flowing in the opposite direction will carry you to poverty, misery and unhappiness. You control the switch when you control the thoughts you emotionalize and allow access to your subconscious. Poverty needs no plan. It is bold, ruthless and will happen automatically. Significant achievement is shy and timid. It must be attracted, wooed and set in motion by your action plan.

✦ ***Tap into all the Sources of Strength (Power) available to you. Did we say this already? Must be important.***

## **Principle 10: Sex** – *This is misunderstood. Let's seek to understand.*

Sex triggers powerful emotions which 1) perpetuate mankind, 2) maintain health and 3) can transform mediocrity into genius. Sex desire is among the most powerful of human desires. When driven by this desire men develop keen imaginations, courage, will-power, persistence and creative ability they did not know they had. When harnessed and directed, this motivating force maintains all of these attributes and can empower significant achievement.

The desire for sexual expression is inborn, natural. It cannot and should not be submerged or eliminated. It should be expressed through forms which enrich the body, mind and spirit. Hill calls this transmutation. If not given enriching expression, sexual desire will seek purely physical outlets.

✦ ***The sex drive can power action for good or ill. Learn to channel it rather than submerge, eliminate or succumb to it.***

Research going back more than 2000 years indicates convincingly that men and women of great achievement possess highly developed sex desires. The “irresistible force” of the sex emotion empowers action. Sex transmutation can lift you to genius status. Research has disclosed: 1) Men of great achievement have learned the art of sex transmutation. 2) Men who have accumulated great fortunes and achieved outstanding recognition in literature, art, industry, architecture and the professions were motivated by the influence of a woman.

A castrated bull becomes docile. Sex alteration of a male or female takes out the “fight.” Here are ten stimuli which may key you to high “rates of vibration”, such as enthusiasm, creative imagination or intense desire: 1) desire for sexual expression; 2) love; 3) a burning desire (for fame, power, money); 4) music; 5) genuine friendship; 6) a Master Mind alliance (harmony between two or more people who ally themselves for spiritual or temporal advancement); 7) mutual suffering (as in persecuted people) which forces you to surrender; 8) auto- suggestion; 9) fear; 10) narcotics and alcohol. Do your own research. You are likely to discover the emotion of sex is intense and powerful, stepping up vibrations in the mind and triggering the wheels of physical action.

Let’s define a genius as one who has discovered how to increase the vibrations of thought to the point where he/she can freely communicate with sources of knowledge not available through ordinary thought vibrations. So how can one communicate with sources of knowledge not ordinarily available? Are there sources available only to the genius? What are they? How may they be reached?

Hill contends that the sixth sense of “creative imagination” has been fairly well established. The majority of people rarely use creative imagination during their lifetimes and discover it only by accident. A few people deliberately learn to use this faculty and become geni. Creative imagination is a direct link between man and God. Religious revelations and new discoveries take place through creative imagination. You may receive a hunch or inspirational flash of an idea or concept through God, your subconscious, the mind of another who releases a conscious thought or another person’s subconscious. **When you realize we are all connected at a deep sub-atomic level, you realize that all of these are essentially the same.** When the brain is stimulated, the effect lifts you far above ordinary, permitting you to see distance, scope and quality of thoughts not available on the lower plane (business or professional routine). It is like being in an airplane where you can see beyond the horizon.

Sometimes when I am writing this eBook or engaged in other projects, my wife will call to say it is time for dinner or want me to perform a chore. It takes a minute or so for me to get back down to earth. Have you ever experienced something similar? If so you may be able to move to the genius level, as you learn to transmute sex desire into higher levels of achievement. You seem to leave this world. **You are intensely focused on the now.** The cares of food and the daily activities of life disappear. You step into a level where your creative imagination operates through a sixth sense, relying on a still small voice with the great artists, writers, musicians and poets. Your best ideas may come through “hunches.” Close your eyes and learn to speak through the ideas which come to you from within. Draw on a source of superior intelligence.

- ✦ *The sixth sense of creative imagination is waiting, just outside the activities of daily life. You can learn to tap into this faculty and rise to heights you never dreamed of.*

Dr Elmer Gates has created 200+ useful patents. He would go into a sound proof, darkened “personal communication room,” turn off the lights and concentrate on the known factors of the invention he was working on. **This is an intense focus on the now.** As the ideas would begin to flash into his mind he would write. He earned his living “sitting for ideas.”

Let’s become a genius. First organize and combine all the known ideas and principles for the project you are working on through your synthetic imagination. You may conduct research, talk to your Mastermind Group and draw on your past experience. Some of the pieces to complete the project are still missing. **Now** it is time to draw on your creative genius. Isolate yourself so you won’t be disturbed.

Stimulate your mind (remember the ten mind stimuli). **Concentrate** on the known factors. **Hold** the picture in your mind until the subconscious takes over. Now relax, clear your mind of thought and wait for answers to flash into your mind. Write them down. Act on them.

Now back to that stimulate your mind part. Poe used drugs and alcohol. I suggest you transmute the sex drive. Think of your husband, wife or someone you care for deeply. Let the love you **feel** for this person **flow** into your mind. You may feel the tingling pulse of sex dancing through your nerves. **Channel the energy** into your mind, away from your body. Creative imagination will start. **Now concentrate, hold the picture**, let the subconscious take over, relax, clear thinking, wait for answers to flash. Whew! At first this takes some work, but you have learned a powerful secret. **As you live more and more in the present, this concentrate, hold, flow becomes a part of your daily living, your Being.**

- ✦ *Learn to transmute the sex drive into creative imagination.*

Lincoln learned to use the faculty of creative imagination after he fell in love with Ann Rutledge. Napoleon was inspired by Josephine to become irresistible and invincible. When Napoleon’s “thinking” prompted him to put Josephine aside, his “waterloo” was not far away. The pages of history are replete with stories of men who achieved much following the influence of their wives only to fail after money and power triggered putting aside the old wife for a new one. Here is a list of a [few men](#) who have learned to transmute the sex drive (or love of a woman) into high achievement.

Hill analyzed more than 25,000 people and discovered that success seldom occurred before forty and frequently not until well past fifty. He uncovered an interesting reason. Before forty or fifty men tend to dissipate their energies through over indulgence in the physical expression of the sex urge. Many men never learn that the sex urge has other possibilities which transcend the physical expression and when they do it is only after wasting many years when the urge is at its height. The sex emotion is powerful and impelling. When harnessed it may raise one to the level of genius.

Personal magnetism flows from sex energy. A study of 30,000 sales people uncovered that the most efficient sales people had high sex drives. High energy magnetism can be communicated through a hand-shake, the tone of voice, posture, thought vibration and personal appearance. When you shake hands let energy well up from your abdomen and flow through your arm to your hand. Move briskly with grace and ease. Mix emotion with your thoughts to influence those around you. Select clothing which becomes your personality, physique and complexion. Select salespeople with personal magnetism. Realize that people without sex energy don't become enthusiastic or inspirational.

Intemperance in sex habits is as detrimental as intemperance in eating and drinking habits. Indulgence dissipates creative intelligence and may destroy reason and will-power. When discussion of sex urges is verboten, people do not learn to transmute their sex drive to higher levels of achievement. Instead the drive impels behavior which dissipates achievement.

✦ *When sex is verboten people do not learn to transmute the drive into achievement.*

When the emotion of love mixes with the emotion of sex the result is calmness of purpose, poise, accuracy of judgment and balance. Blurt your sexual feelings and she is likely turned off. Learn to control and direct your feeling. Write a sonnet. Achieve a worthy goal. Win her heart. Direct the destinies for both of you. There is a significant difference between the uncontrolled sexual drive and the balancing effect of true love.

Emotions are states of mind which can be consciously controlled. Through chemistry you can mix certain elements, none harmful, and create a poison. Mix the emotions of sex and jealousy to create a deadly effect. Mix the emotions of sex and love to create a genius. The road to genius consists of developing, controlling and using sex, love and romance. Encourage positive emotions as dominating thoughts. Discourage negative emotions. A negative emotion can be transmuted to a positive emotion by changing your thoughts.

Passion (sex desire) leaves unmistakable marks on the face, visible to all who wish to read them, advertised by the expression of the eyes and lines on the face. Love softens, modifies and beautifies the facial expression. Love brings out and develops the artistic and aesthetic nature of man. It impresses the soul after the fire has been subdued by time and circumstance. Love lingers, guides and influences long after the stimulation fades. Genuine love leaves enduring, spiritual traces. You can return to this emotional stimulation to trigger your creative imagination.

Love may be fleeting, whimsical and temperamental. You can decide whether to allow love to happen when it beckons. When you allow it to burst into flame, guide that flame to new heights of achievement through your burning desire. If you have loved once, you can love again. Love of parents, friends, country and God, though not of a sexual nature, may trigger the subconscious and enable you to rise to significant heights of achievement. But the most powerful love is mixed with sex and romance to touch the heart of God. That is when a genius is born.

Perhaps man's greatest motivation is his desire to please his woman. This desire motivated the hunter to bring back food and appear great in her eyes. Today's hunter gets cars, clothes, bigger homes and college educations. The power behind great men is often a woman and his family. Likewise behind a great woman is her husband and children.

- ✿ ***Behind great men and women is the power of love, sex and romance.***
- ✿ ***Touch the heart of God. Find love in your life.***
- ✿ ***When you find love, cherish it, nourish it, keep the flame burning brightly.***
- ✿ ***Learn to transmute love, sex and romance to achieve your highest ambition.***

## Principle 11: Subconscious Mind – *This is the connecting link.*

The subconscious connects your mind to God, the ultimate Master Mind, Infinite Intelligence, the Universe, the ether, Chimorel's primary Source of Strength. Do not dismiss the notion of God too quickly. If you do, you will forgo a Source of Strength that can power achievement of your goals. Whether God is a figment of your creative imagination or very real to you, tapping into His wisdom can guide your plan to creation and implementation.

- ✦ *Your subconscious works day and night on the dominating emotionalized desires you send it.*

Remember the seventh action step to move from wishes to achieving your goals – See, feel, believe? You may not understand exactly how your subconscious connects to God, but when you send an emotionalized desire to your subconscious something there acts and sends back hunches or flashes which your mind can pick up. You then must act on these inspirational flashes. Write them down, organize your plan and make it happen.

Your prayers are always answered. They are not always answered the way you would like them to be, but they are always answered. This connecting link is stupendous, imponderable, awe inspiring, and perhaps a little intimidating because we know so little about how it works. Once you understand the reality for empowering the achievement of your goals, you can grasp the importance of making your desires clear, positive. Reduce them to writing and pursue them persistently.

The subconscious is directed by habit, empowered by faith. If you have not yet mastered faith, your results will require patience and persistence. Your subconscious functions whether or not you try to influence it. Thoughts of fear, poverty and other negative emotions will be picked up and implemented, unless you control these impulses and give your subconscious more positive food. **Awareness is outside conscious input to the subconscious.** *Explore our additional Insights to become more aware.*

## **Principle 12: The Brain – This is the broadcasting station**

The brain acts as both a sending and receiving station for the vibration of thought. Hill working with Dr Alexander Graham Bell and Dr Elmer R Gates made this observation as he was writing *Think and Grow Rich*. Emotions increase the rate of vibration for this “broadcasting” station. Let’s give two examples:

*As an attractive female or a hunk you may have picked up silent wolf whistles, unspoken cat calls or admiring stares. Perhaps you were walking the other direction. No word was spoken. You just felt something. You may even wonder why until you turn to face the stare. Your brain was acting as a receiving station.*

*A few paraplegics are now able to type using nothing more than thought energy through a device attached to a computer. You may have seen this recently on the news. One professor, incapable of motion, still conducts classes using this method. His brain is acting as a sending station.*

We are a long way from truly understanding this “broadcasting” station, but by using the principles of the subconscious, creative imagination and auto- suggestion you can operate your own “broadcasting” station today.

As you begin to implement your Master Mind Group and as you learn about the principle of the sixth sense, recognize the power available to you through your mental broadcasting station. Start with desire. Increase the rate of your thought vibration through faith, love, sex and similar positive emotions. Send your thoughts to your subconscious.

Repeat the process through auto-suggestion until you begin to receive flashes of inspiration. Let your creative imagination flow and you will begin to develop the plan that will enable you to achieve your goals. Test your plan against reality and keep improving it until it works.

✦ **As you implement your Master Mind group and learn about the sixth sense, tap into the power available to you.**

Let's step away from *Think and Grow Rich* briefly to look in on Eckhart Tolle's *The New Earth*. ***The past was. The future will be. Only the present is. If your thoughts dwell in the past or cling to the future, they are illusions. If you are present and plan today, your world is real. Being present is being aware that wishing won't make it so. If you want to make your dreams come true, you must live and act in the present.*** At the end of Principle 13: Sixth Sense we will talk about the mind being different than the brain and share a little more about awareness.

## **Principle 13: Sixth Sense** – *This is the door to the temple of wisdom.*

Have you mastered the other twelve principles yet? Here they are:

**Desire**

**Faith**

**Auto-suggestion**

**Specialized Knowledge**

**Imagination**

**Organized Planning**

**Decision**

**Persistence**

**Master Mind**

**Sex Transmutation**

**Subconscious**

**Brain**

If not, you are not likely to understand, assimilate and apply the principle of the sixth sense successfully. Through the sixth sense, you can be warned of impending danger and notified of potential opportunities in advance. If you see God as the source of all wisdom, then the sixth sense is the door to the temple of wisdom. You may instead see yourself as connected to everyone else. Through your sixth sense, you tune in to those who can support you and begin to manifest your plan. The sixth sense involves a mixture of the mental and the spiritual. It may be considered a medium of contact between you and God. You tap into the sixth sense by preparing yourself through meditation and becoming aware.

- ✦ *Master the other principles of success in order to open the door to the temple of wisdom.*
- ✦ *Prepare to tap into the sixth sense through meditation/awareness.*

Unlike the other senses, the sixth sense defies description. It can be experienced only after you prepare yourself. It is like receiving a guardian angel who opens the door to the temple of wisdom. Nature has established laws from which she does not deviate.

We do not understand all of these laws, so “messages from Heaven” may appear to be miraculous. The sixth sense is like this. We don’t understand how it operates, but we can benefit by learning how to tap into it. Hill talks about a power, First Cause or Intelligence that permeates every atom of matter. God converts the acorn to an oak tree, causes water to flow downhill by gravity, changes the seasons in due course and can transmute your desire into tangible achievements. Hill experimented with and experienced it. I have experienced it. You can achieve it, if you immerse yourself in the principles and become prepared.

On his success journey Hill held nightly meetings over a period of years with an imaginary council he called his Invisible Counselors – Emerson, Paine, Edison, Darwin, Lincoln, Burbank, Napoleon, Ford and Carnegie. His purpose was to build his character to be a composite of his imaginary counselors. He would speak to each of his counselors asking for their assistance to develop specific character traits possessed by these men. He studied their lives carefully. After some months the characters took on real personalities.

Lincoln was always late and solemn. Burbank and Paine were witty. Napoleon saw the church as a pawn of the state. Over time he added other members to his cabinet – Christ, St Paul, Plato, Confucius – more than fifty all told. Hill always considered his cabinet imaginary, but he was able to receive real advice for his own life and that of his clients.

✦ ***It is possible to create a cabinet of “Invisible Counselors.” This takes time and a significant ability to tap into spiritual resources.***

I have experimented with my own cabinet (Mastermind Group): Christ, Budha, Hill, Carnegie, Ford, Lincoln, Washington, Gandhi & Dr Gunsaulus. For some reason, Napoleon seems to pop in occasionally. I do not see my cabinet as personalities. I do get flashes of inspiration as I “talk” to one or another of my counselors. Then sleep comes and I am ready for another day. Let’s pick up on that phrase Mastermind Group. I have not yet formed a Master Mind Group of real people. I search, but am not there. My current Master Mind Group consists of these invisible counselors. And I do seem to get good guidance when I turn to them. I look forward to forming a Mastermind Group with real people.

Here are seven positive emotions – Desire, Faith, Love, Sex, Enthusiasm, Romance and Hope. Here are seven negative emotions – Fear, Jealousy, Hatred, Revenge, Greed, Superstition and Anger. The dominating influence in your mind will either be positive or negative. Form the habit of applying and using positive emotions. This will enable you to tap into the sixth sense. It will also block negative emotions, which keep you from tapping into the creative imagination within your subconscious.

✿ ***Learn to recognize positive and negative emotions as they enter your mind. Feed positive emotions to your subconscious with your burning desire. Eliminate negative emotions before they reach your subconscious.***

For just a moment let's take the prayer message Hill gives and add to it today's understanding of physics. We have mentioned the interchange of energy and matter below the atom level already.

***At the quanta level (10,000 to 10,000,000 times smaller than the atom) our bodies, as well as, all other matter consist of 99.9% "dancing energy." At this level subatomic particles pop in and out of existence moment by moment. Einstein (yes that's Albert Einstein) determined that light behaved as particles (matter). Other scientists proved it behaved like waves (energy). Are you getting the picture? As you become aware this dancing energy can manifest inspiration in your life. As the observer, you can affect the experiment.***

***The scientific community has been forced to alter its view of the universe. Dr David Bohn, esteemed theoretical physicist, has determined that we (all humans) are interconnected. Actually, everything and everyone is interconnected in a most profound way. Using the principles of quantum mechanics and particle physics, he and others have established that at this invisible level of reality we are connected as mind, energy and matter. This potentially incredible concept is the reality we know today.***

When Hill talks about using the "science of prayer" he is talking about communicating at this subatomic level, sending out positive thoughts that come back in flashes of inspiration directly from this interconnected energy. For me this is where God dwells.

✿ ***Be aware of the forces at work at the quanta level. In future eBooks we will teach you how to tap into this energy to enhance all your relationships and more.***

The ability to use the sixth sense comes slowly through years of meditation, self-examination and serious thought. It requires maturity, access to spiritual forces and a genuine understanding of the principles discussed. Hill discussed this principle with the intention of understanding – self, others, the laws of nature and happiness. As you read this discussion of the sixth sense perhaps you were lifted to a high level of mental stimulation. Come back. Read again.

Soar to still higher levels of stimulation. Eventually you will find yourself with a power to throw off discouragement, master fear, overcome procrastination and draw freely on your imagination. Allow this moving spirit to touch your life, transmute your desires and achieve your goals.

In our eBook *Create a Chimorel Project* we will teach you how to expedite your journey into the sixth sense through awareness. We have mentioned that the brain is like a broadcasting station, enabling you to communicate with the universe. Begin your journey with three simple words – acceptance, joy, enthusiasm. Learn more as you continue your journey. Begin your journey with three simple words – acceptance, joy and enthusiasm. Learn more as your journey continues.

***Deep within you is the potential for radiant joy, unshakeable peace and absolute love. This joy, peace and love spreads throughout the universe. You might call this joy, peace and love awareness, enlightenment, the end of suffering. From this center of the universe you (your brain) communicates with God. You do not think with your mind, you feel with your soul. You become aware. You are. Allowing your mind to dwell in the past or live in the future creates an illusion that blocks your conscious awareness in the present. You must learn to see between your thoughts to touch the face of God. Acceptance, moves toward joy, when times are tough. Enthusiasm sprints beyond joy to imbue with peace and love.***

## Principle 14: Overcoming Fear – *This outwits the six ghosts of fear*

Hill does not list overcoming fear as a Principle. But I believe overcoming fear is one of the most important parts of achieving your goals. If you allow indecision, doubt and fear into your life, you may never tap into the sixth sense. Indecision crystallizes into doubt. These two slowly blend into fear.

- ✿ *If you allow indecision, doubt and fear into your life, you will never tap into the sixth sense.*
- ✿ *Indecision crystallizes into doubt. Indecision and doubt slowly blend into fear.*

Six basic fears we all contend with include fear of poverty, criticism, ill health, loss of love, old age and death. Fear is a state of mind, subject to direction and control. You can control your mind. You can allow the thoughts of others to affect you or you can close off those thoughts which do not enhance your goals and open your mind to thoughts which enable you to achieve your goals. You have absolute control over your thoughts.

## **Fear of Poverty**

The path to poverty goes in the opposite direction from the road to wealth. Having read through 35 pages of *Your Secret to Success*, you have a choice. You are the only one who can make this choice. You can accept poverty. For that matter you can do nothing and doing nothing will lead to your choosing poverty.

OR You can demand life's wealth. The state of mind that leads to wealth cannot be bought. It must be created. The paralyzing fear of poverty is a state of mind. You make the choice. Fear of poverty can be subtle, frequently unrecognized or not acknowledged. Symptoms include indifference, indecision, doubt, worry, over-caution, procrastination, expecting poverty instead of demanding wealth.

- ✦ *Symptoms of the fear of poverty include indifference, indecision, doubt, worry, over-caution, procrastination and expecting poverty instead of demanding wealth.* Eliminate these symptoms.

## **Fear of Criticism**

Criticism engenders a highly developed fear. A defense against theft and other bad behaviors is to criticize the victim. Politicians (down in the polls) besmirch their opponents character. Clothing styles, bald heads, new autos and relationships all are affected by the fear of criticism. Criticizing a child builds an inferiority complex. Symptoms include self-consciousness, lack of poise, inability to decide or express opinions, side-stepping issues, using big words without knowing the meaning, extravagant spending, lack of initiative and lack of ambition.

- ✦ *Symptoms of the fear of criticism include self-consciousness, lack of poise, inability to decide, side-stepping issues, using big words without knowing the meaning, extravagant spending, lack of initiative and lack of ambition.* Eliminate these symptoms.

## **Fear of Ill Health, Old Age and Death**

The roots of ill health may be physical and social heredity. This fear is associated with fear of old age and death. Perhaps 75% of those visiting doctors suffer from a mild or severe case of hypochondria. The fear of a disease can produce physical symptoms. A New York mayor successfully stopped a flu epidemic by getting the newspapers to stop publishing stories about the epidemic.

Disease can begin in the form of a negative thought. Here is an interesting story. A young man (disappointed in love) hovered between life and death for months. A specialist in suggestive therapeutics changed nurses. By pre-arrangement a charming nurse caused the young man to fall in love and recover. They were married and lived healthily thereafter. Fear of old age and death may be associated with poverty, thoughts of hell, diminished sex attraction, and loss of independence. Symptoms of these three fears include hypochondria, susceptibility, self-coddling, intemperance, diminished initiative, reduced self-reliance, thoughts of dying, religious fanaticism.

- ✦ *Symptoms of the fear of ill health, old age and death include hypochondria, susceptibility, self-coddling, intemperance, diminished initiative, reduced self-reliance, thoughts of dying and religious fanaticism. Eliminate these symptoms.*

### **Fear of Loss of Love**

When polygamous males steal your mate or when other circumstances raise the specter of loss of love, the jealousy and pain frequently plays more havoc with the body and mind than other basic fears. Symptoms include jealousy, fault finding, gambling, cheating, bad temper and lack of persistence.

- ✦ *Symptoms of the fear of loss of love include jealousy, fault finding, gambling, cheating, bad temper and lack of persistence. Eliminate these symptoms.*

### **Worry**

Worry is a state of mind based on fear. Slowly, persistently, insidiously worry destroys self-confidence, paralyzes reason, and unsettles the mind. The antidote to worry is to make decisions and take action. The six fears translate into worry by indecision. Decide death is inescapable and act to enjoy life. Defeat poverty by deciding to live with what you earn and take steps to earn more. Kill criticism without worrying about what others think. Old age will come with its wisdom and self-control.

## Devil's Workshop

Your susceptibility to negative influences subtly, but fatally affects you. The resulting negative thoughts kill creative imagination. They create a negative personality which repels the people you need to achieve your goals. It imbeds the negativity in your subconscious and becomes part of your character.

Again, you control your mind. You feed it the thoughts on which it grows. You must protect yourself against subtle negative influences. People by nature tend to be lazy, indifferent and susceptible to negative suggestion. When you are around people who depress or discourage you, close your mind against their influence. You might want to clean out the medicine cabinet. Deliberately seek out people who encourage you to think for yourself. Do not expect troubles, expect success.

✦ *Control your mind. Feed it the thoughts on which it grows. Protect yourself against negative subtle influences. The antidote to worry is to take action.*

There is no legal protection against those who poison your mind by negative suggestion. Your mind is your spiritual asset. Protect it with your life. It just might be your most valuable possession.

## +2 Surrender Ego to Live in the Present Moment and the Divine Matrix

Although Hill touched on the idea of living in the present, it was not listed in his Success Principles. The Divine Matrix could be considered as very similar to the Sixth Sense principal; however, today's quantum physicists have brought this principle into clearer focus. *Click the link above to view a summary of insights from Eckhart Tolle's The New Earth.*

To watch the sun rise and set, a relative truth, your perspective will be from the earth's surface. From the Milky Way the sun shines perpetually, the absolute truth. The truth is an undivided whole, experienced in the present moment. This truth is cut into relative fragments by thought, a dispersion of the divine matrix of energy. Consciousness removes the fragments. We become aware. "Blessed are the meek for they shall ..." The meek are the egoless, who embody a surrendered state. Within you, at this moment, is the potential of arising to a new heaven on earth.

Your desire energizes creating the plan to achieve your goals. Your new mindset opens the door to a better world. Reduced to the smallest components your body, your emotions, your thoughts are energetic vibrations. At this energetic subatomic level we constantly send out vibrational thoughts and feelings connected to a cosmic matrix/network. Based on current quantum science, vibrational frequencies attract similar frequencies, the Law of Attraction.

To speak to this cosmic/divine network you use “emotional lingo” sometimes called “vibrationese.” You might think of this language as a Magic Genie who does not understand words but responds to your emotions. When you are unhappy, the Genie says my master wants sadness, here you are master. When you feel joy, the Genie knows to send more excitement and happiness. You decide what to send to the Genie. The Genie gives you more ... abundance, joy, peace, love, health, wealth, happiness or anger . Now let’s take a look at yourself and determine what you want to attract.

## Looking at Yourself

Here are [some questions](#) to guide the process of eliminating negative influences. As you read the *questions*, answer out loud and listen to your answers. Then think about how you can eliminate negative influences. Shall we say it again? Then do it.

Here are [famous alibis](#) by Old Man If. Should you decide to fail, we have provided you with all the alibis you need to justify your choice. Of course, alibis won’t pay the bills. They won’t solve your problems or achieve your goals. They won’t make you happy. Plato said, “The first and best victory is to conquer self. To be conquered by self is ... the most shameful and vile.” Elbert Hubbard said, “It has always been a mystery to me why people spend so much time creating alibis.... This same time would be sufficient to cure the weakness, then no alibis would be needed.”

***There is a duality in the world in which we live – positive and negative. This duality dwells in the past and lives in the future. When we can truly live in the present, this duality (illusion) fades and you just are, basking in joy, peace and love. Could it happen that more of the world will let go of the past/future to live now? I believe this is how we will change the world we live in.***

## Welcome to the Opportunity !!!

You now have the key which unlocks *Your Secret to Success*. It cannot be bought. It must be discovered. The secret starts with your burning desire to achieve a significant goal. You fuel this desire with faith inspired, repetitive suggestions to your subconscious.

When your subconscious receives your clear objective mixed with emotion it immediately goes to work. You will begin to receive flashes of inspiration which you transform into a plan. Your plan will involve obtaining the specialized knowledge needed. Tap in to your creative imagination, when organizing the knowledge does not yet give you the answers. Make decisions in the present moment. Persistently implement your plan. Change it when necessary. Overcome fear and tap into a sixth sense. Be aware that you are connected to a divine matrix which sends you what your emotions ask for.

You will empower your plan by establishing a harmonious relationship with Master Mind resources, learning to use the broadcasting station of your brain, as well as, directing and controlling your sex drive and mastering your fears. ***And perhaps you will empower your life by learning to live in the present.***

Hill's book consists of 235 pages. We have parsed this to approximately 40 pages. [Leaders are readers](#). Keep reading until you get it. Then make it happen.

Lessons 4, 5 and 6 set up an Action Plan with sub-goals and To Do Opportunities. Chimorel intends to reach out to thousands of people with your support. You can use parts of Chimorel's Action Plan to establish your own action plan.
